## What is the Adobe Sign Resource Hub?

The Adobe Sign Resource Hub is an intranet page for organizations to host all Adobe Sign content. It includes written and video tutorials, product availability, blogs, an organization usage chart, an environmental impact calculator, and more. The goal is to have a place for Enterprise users to get started with Adobe Sign.

## What is the Adobe Sign Resource Hub Kit?

To help get our customers started, we've created The Adobe Sign Resource Hub Kit with steps for creating an intranet page. The kit should be used by either an IT Admin or someone on the organization's web development team.

We've provided all the links, collateral, and some code for web development. While this is intended to be a stand-alone document, we recognize that some organizations may choose to leverage Professional Services, in the event that they do not have a web developer or IT person who can work through the steps.

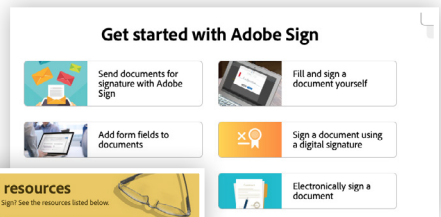

## What is the Adobe Sign Resource Hub Kit? *continued*

### What's included?

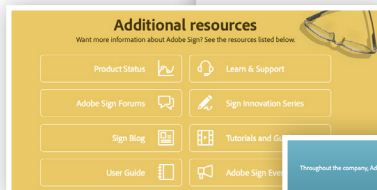

The kit has been divided into two sections, the first part is a set of recommended elements, helpful links to our Adobe Sign Helpx site, and links to registration pages. The second section contains developer instructions and files (\*.zip) to build the Usage Chart and Environmental Impact Calculator. The file includes:

- Content formatted in HTML
- Styles supplied in CSS
- Sample JSON data
- Ready-to-use JavaScript
- Dynamically-generated SVG charts

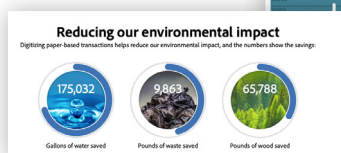

Adobe Sign tutorial links.

Resource links.

Data-driven charts and diagrams based on Adobe Sign usage reporting data.

## What are the benefits?

We've had multiple customers request an intranet page similar to that of The State of Hawaii, also highlighted in the Spark page. In response to this request, we've created the guide for customers to develop their own portal.

## Benefits to the Organization

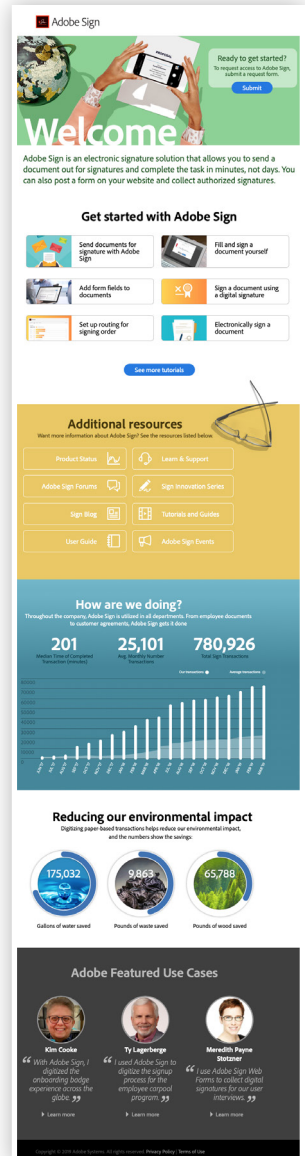

- Builds product awareness within the organization so employees know what's available
- Centralized location for employees to learn about Adobe Sign and how they can use it
- Easy process to request access
- Quick look at the organization's usage
- Understanding of environmental impact

## Benefits to Adobe

- Expand use cases
- Increased exposure
- Drives usage

Sample intranet page containing some working examples from the Adobe Sign Resource Hub Developer Kit.

## Convince your customers

Talk to your customers about the availability of the Adobe Sign Resource Hub Kit, what it contains, and how they can leverage it. Make use of the Spark page to demo what's been achieved thus far.

## Questions? Feedback?

We hope your customers will find the guide easy to follow through implementation.
